The need for training

Figures collected from 1996 – 2008 show that almost every year, the most common cause of fatal injuries was falling from a height. This was followed by transport accidents (which include being hit by a vehicle or falling from a vehicle.)

However, hundreds of people also died after being struck by a moving or falling object or being trapped by something falling or collapsing.

The type of vehicles involved in injury accidents over this 12-year period included cars, trucks and vans – but the highest level of injuries were related to **lift truck accidents**.

There is an average of 1,500 accidents involving lift trucks every year – and research suggests that a high percentage of these are due to lack of training for lift truck drivers or poor maintenance of the truck.

Why use Key Performance Training Ltd for your training needs?

At Key Performance Training Ltd, we can offer RTITB accredited operator training and instruction from fully qualified RTITB instructors and examiners who are able to carry out training to the legal requirements of the HEALTH and SAFETY at WORK act 1974 (HaSaW act 1974), The APPROVED CODE of PRACTICE for lift truck training (L117), LIFTING OPERATIONS AND LIFTING EQUIPMENT REGULATIONS (LOLER) and the PROVISION and USE of WORK EQUIPMENT REGULATIONS (PUWER).

This can help reduce the likelihood of accidents and improve the safety of both operators and pedestrians in your workplace.

Many of the RTITB lift truck courses are available via our on-line Course Calendar with various dates to choose from, each held at our training facility in Swindon. If, however you are looking for a course to be delivered 'in house', at your site or offices, then Key Performance Training can cater for this request. Please contact the office for more details.

RTITB Reach Lift Truck Novice Course

Our RTITB reach lift truck novice course is for operators with little or no previous experience using a reach lift truck.

This course enables the successful trained operator to use any reach lift truck up to and above an 8-metre lift (with authorisation) anywhere in the UK. The reach lift truck is one of the most common lift trucks in use today and are the workhorse of most materials handling operations.

Who Should Attend the Course

The RTITB reach novice operator course is designed for those with no prior experience of lift truck operation, who wish to achieve a nationally recognised operator qualification in the safe and correct use of reach lift trucks up to and above an 8-metre lift.

What Will You Get from The Course

Successful delegates will gain suitable and sufficient understanding of current relevant legislation, learn new skills, ability and best practice in the safe use of reach lift trucks up to and above an 8-metre lift in line with current approved methods and manufacturer's instructions.

The course agenda includes:

The theory section of the course would be carried out on the first day to give the candidates the knowledge and background information needed before operating any trucks. This normally lasts up to 5 hours and would be delivered in a classroom format, the content of which is:

- Course introduction and induction
- Health & Safety at Work act 1974 (HaSaW act)
- Lifting Operations and Lifting Equipment Regulations 1998 (LOLER)
- Provision & Use of Work Equipment Regulations 1998 (PUWER)
- Approved code of practice
- Operator safety and observation
- Pre-shift checks & test
- Defect reporting procedures
- Lift truck stability – engineering principles and weight assessment
- Vehicle loading and offloading

Unit 1 Headlands Trading Estate, Swindon, Wiltshire. SN2 7JQ

time on the lift truck gaining experience and practicing skills on all aspects of lift truck operation, including:

- Driving within simulated restricted working conditions
- Maneuvering skills within a restricted area, including barrels and a chicane
- Rated capacity & load centres
- Hydraulic system and use of the controls
- Stacking & de-stacking – using bulk stacking on pallets, stillages and industrial racking.
- Refueling and recharging procedures including battery handling and housing
- Theoretical examination
- Practical examination

Course Content and Price

- Course duration: up to 3 – 5 Days, usually 8:30am to 4:00pm
- Course price: £600 + vat per person (£720 including vat)
- Maximum instructor/delegate ratio: 1:3
- Delivery method: classroom & practical training and assessment
- Prerequisite: none
- Awarding body: RTITB
- Assessment: multiple choice & written paper and practical skills assessment

Testing and Certification

At the end of the week, the candidates will need to complete three tests, which consists of the RTITB theory test, pre-use check and the RTITB practical test of basic operating skills. By the end of the course the successful learners will have a detailed understanding of vehicle operations and the roles and responsibilities of counterbalance lift truck drivers, including their legal responsibilities and the legislation affecting use.

Successful learners will be presented with an RTITB approved certificate and photo ID card and will also be registered onto the RTITB National Operators Registration Scheme database of approved lift truck operators (NORS) for 3 years.
